# access portal
# BASIC

**Access Portal Basic is the latest release in the Access Portal range of management software for access control systems. The software is free, easy to install and provides a host of features.**

A key benefit of Access Portal Basic is the ability to access your site through the network or an internet enabled device, such as a smart phone or tablet, giving you unrivalled flexibility to manage your site, no matter where you are.

The system provides a variety of standard reports, as well as the ability to create customised reports. However, an enhanced feature of the software is the ability to also display content graphically, for a quick dashboard view of your site.

Other features of Access Portal Basic includes integration with a variety of biometric readers, automatic hardware configuration for an easier installation, as well as the ability to suspend tags for greater security.

Another benefit of the Access Portal range, is the ability to seamlessly upgrade the system, as a site grows, without impacting on your operation – providing you with peace of mind, no matter the scale or scope.

Access Portal Basic requires a computer to install and run the software, and operates on a SQL Express database.

**The system features include:**

- Free software
- 1 000 tagholders
- 3 tags per person
- Up to 100 000 buffered transactions
- Up to 8 anti-passback doors per site
- Up to 8 tagholder access groups

- Full biometric integration
- Customisable reports
- SQL Express database
