

ACTi IP Utility Release Notes

Product: IP Utility
Version: v3.5.32 (build 110217)
Release Date: February. 17, 2011

Latest update: (based on v3.5.28)

- 1 Support PlatformK firmware upgrade.
- 2 Support PlatformK C1 ISP firmware and Device Resource Configuration upgrade
- 3 Support device search by selected network interface in multiple NIC PC.
- 4 Not allow PlatformA firmware upgrade from 3.11 to 3.13 directly. The firmware 3.11 does not enough ramdisk space for 3.13 firmware upload. That causes device was hanged when update firmware from 3.11 to 3.13. It needs to upgrade to 3.12 first, then to 3.13 firmware.

BUG-FIX

- 1 Bug #6561. host name include "&", search will be fail.
- 2 Bug #7797. Allow firmware upgrade on multiple channel video encoders' channel modules even if the router firmware version is different.
- 3 Fix the IPradio javascript error.
- 4 Bug #7807. Cannot firmware upgrade when select multiple devices because the firmware version comparison algorithm is buggy.
- 5 Bug #7845. Correct the version information
- 6 Fix the sorting by IP addresses
- 7 Fix the sorting by channel number in multiple channel video encoders.

Limitation

1. Profile pack upgrade only supported by:
 - A. Platform T: FW version v4.06.09 or above
 - B. Platform A IP camera: FW version v3.09.14 or above
 - C. Platform A video server: FW version v3.11.11 or above
- 2 Only Platform T and Platform A support camera profile pack upgrade
- 3 Please do not power off or reboot your device when upgrading firmware
- 4 Only device discovery supports in the decoder and CAM-xxxx camera. The rest functions of IP Utility should not be used.
- 5 Change IP address for unreachable device.
This function is available for some devices with specific firmware. Here is the list of these devices.
PlatformA cameras and video encoders: A1D-220-V3.10 and later.

PlatformT camera and video encoders: A1D-310-V4.09 and later
